

LEANDRO FARIAS

Front-End Web Developer

+2 years as a Front-End Web Developer. My focus is on creating exceptional digital experiences and solving problems in web development. I stand out for my strong knowledge in JavaScript, TypeScript, React.js, Next.js, and Astro, as well as my experience in Back-End development with Node.js and .NET. Currently, I am working where I have identified and effectively resolved errors in the March Desktop system, collaborated on the development of various modules, and contributed to different projects.

EXPERIENCE

Mills

Junior Full Stack Developer and Remote Support Technician MAY 2023 (Present)

- Identified and effectively resolved errors and bugs in the management system with integrated electronic billing, March Desktop.
- Collaborated in the development of a warehousing module for efficient handling of material entry and exit between branches, improving logistics in March Desktop.
- Actively participated in the creation of an E-commerce system, which included the design and implementation of the shopping cart, the payment system through Mercado Pago, and the synchronization of products online, effectively integrating with March Desktop.
- Migrated the March Desktop system to March Web, providing a complete range of services covering item control, electronic billing management, and user support, contributing to the evolution and expansion of the system.

Freelance

Timewise - Reservation App AUG 2023 (Completed)

- Designed and implemented an online payment system with MercadoPago to facilitate secure reservations.
- Provided training to administrators for managing schedules, services, and rates.
- Developed a statistical module to obtain relevant information about user usage and preferences.
- Introduced a reservation cancellation system using codes, improving the customer experience.
- Configured automatic reminders via WhatsApp to enhance efficiency in reservation management.

PROYECTOS

E-Commerce

Technologies: React.js • JavaScript • HTML • CSS **Link:** <https://e-commerce-react-it.netlify.app/>

Developed login and registration functionalities, product catalog, search and filtering, shopping cart, and order history. Implemented best practices for routing and high-quality solutions to enhance the user experience.
